Jerusalem, Israel

## EXPERIENCE

### Full-Stack Developer

#### Octopus Computer Solutions

02/2018 - 02/2019 Tel-Aviv, Israel

Provide computer solutions with a focus on cloud. Deliver a variety of cloud solutions such as - backups, spam protection, VPS, and more.

- Developed, launched and maintained the new company website using PHP Laravel and VueJS.
- Maintained several client websites through either CodeIgniter, Laravel or WordPress.

## VOLUNTEERING

### Webmaster

#### Coral Center

2017 - Ongoing

Coral Center is an organization aimed at bettering the lives of families with children with special disabilities through therapeutic horseback riding. I was a part of the creation of the organization's website. Currently maintains it and add features and contents as needed.

## PROJECTS

### Knock-Knock (Angular)

Smart doorbell that allows a homeowner to interact with his/her visitors.

- Smart-door surveillance using Raspberry Pi 3, Firebase database, Twilio, MS Face API

### Sudoku Solver (C++)

Uses backtracking algorithm to solve any difficulty of a Sudoku puzzle.

- Allows text file input to inject several puzzles into the algorithm.

### Rat-Maze (Java)

Collaborated with two classmates to create an interesting rat-maze solution.

- Connect two separate programs (Rat & Maze) through a TCP stream and have the rat successfully complete the maze.

## ACHIEVEMENTS

### Overcoming Obstacles

Of moving overseas to the US and when returning to Israel nearly a decade later

### Fearlessness

To trying new experiences, such as investing and skydiving
